Impacting human life with nature.

Nature pervades every part of our life and living. From nature comes air, water, and even life. Nature is the fuel that powers Planet Earth. Man was born from nature and was meant to live as one with nature. But along the path of modernization, we lost our way and started taking to ways that moved us away from nature. Planet Green is a movement to connect man to the roots of nature. To enable urban Indian families to rekindle a connection with nature, again. We are here to reunite Mother Nature, with her Children. We have a passion for this, and we are journeying to our vision.

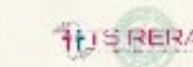

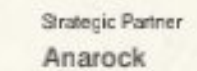

Planet Green is making this happen by adhering to its ethos in each of its projects. With Dates County, an eco-based community. With Farm Natura, a farm-based community so one can also do farming. With Green Land Capital, an initiative where one can grow their own produce while also owning a land.
