SANCTUARY

THE SCIENCE OF LIVING

myscale
SANCTUARY

Increasingly, we've begun to embrace science. And though we may not understand the nitty gritty of it, We understand the benefits of it.

Simply because science is real. The fact is, since time immemorial Science has always made our lives richer. And it will continue to do so in the years to come. It's not a Herculean task either. All it takes is some re-thinking. Some re-drawing and some re-building. And before you know it, your life's improved a whole lot more. That's the science of living. Brought to life at Myscape Sanctuary.

THE VISION

Aesthetics embrace Science

Myscape Sanctuary.

A beautiful nature reserve
where people can come home to.

An oasis of nature if you will,
rubbing shoulders with Hitec City,
thriving amidst a bustling city of social
infrastructure we know as Hyderabad.

We've brought this sanctuary to life with
4 acres of lush greenery, on which stands
4 towers, each with 15 floors. Each home
proudly boasts of a private terrace from
which you can see mother nature opening
up her arms in an embrace below.

4 Acres

of Lush

Greenery

in the centre of Hyderabad on which stands 4 towers, each with 15 floors. Covering only 28% of the ground, this unique concept ensures that there's no vehicular movement inside the periphery, leaving 72% of the property home to sustainable landscape which is made possible thanks to the deep soil zone.

**Here,
aesthetics meet
science to give you
a unique experience
of living in a modern
environment while
also being in the
bosom of nature.**

02

ARCHITECTURAL DESIGN

Built around Nature

Myscape Sanctuary is an architectural triumph, drawing from the heyday of modernist architecture and the finest elements of modern building design. While being gently complimented by the organic, verdant shapes of nature.

The development has been planned in a unique way where deep soil areas have been carefully planned within the development. These deep soil areas will allow tall plantation between blocks, and not excuses for plants. Deep soil zones have important environmental benefits too, that include supporting the healthy growth of large trees with large canopies and improving infiltration of storm-water.

The basement parking is segregated to break the usual unweildy scale and designed to enhance the experience when someone arrives. At the end of the day, it's all carefully planned science to make your living better.

The landscape design blends each apartment into the natural surroundings, encouraging residents to be in touch with nature at all times.

AS THE SEASONS CHANGE, SO DOES THE FAÇADE.

Expansive balconies with personal landscape and staggered angular balconies provide for a porous, intricate façade with an overlay of ever transforming landscape that transforms with the seasons. The presence of landscape on the vertical face of the building significantly contributes to the micro climate within the property.

MASTER PLAN

- 2. Sanctuary Cafe Plaza
- 3. Children's Play
- 4. Therapeutic Gardens
- 5. Tot Lots and Story Telling
- 6. Practice Courts
- 7. Visitor's Parking
- 8. Productive Landscape
- 9. Skating / Cycle Path
- 10. Sanctuary Sculpture Court

A VIEW OF NATURE, NO MATTER WHERE YOU ARE.

Unlike most properties, at Sanctuary, the strategic arrangement of towers around the central park allows for multiple vistas providing generous views for all the apartments and an enhanced open space quality, permeability, visual connect and ease of movement.

The fact that no vehicles are moving around inside makes the central park completely pedestrian and safe for its residents, which is exactly how a park should be.

The strategic placement of Sanctuary Club right when one arrives allows visibility from all blocks and integration to the central court. At half the height of the towers make the Sanctuary Club a great view from everywhere, no matter which tower you're residing in.

ECO FRIENDLY NEIGHBOURS

The Master plan has been designed to create spatial quality and visual connect with nature. The residential towers will have distinct natural treatment to the façade with planter boxes having a variety of plant species. The plants will give a unique appearance to the towers resembling hanging gardens. The high aspect ratio between façade length and apartment depth allow for better ventilation.

A photograph of a forest with many tall, thin, vertical tree trunks. The lighting is soft and hazy, creating a misty or ethereal atmosphere. The trees are mostly light-colored, possibly due to the lighting or the season. The text is overlaid on the right side of the image.

**The fact that we
have large trees
inside has very
little to do with
beauty, and more
to do with science.**

**Our
thinking
is deep.
Just like
our soil.**

Myscape Sanctuary, has been designed so that the Central court has a deep soil zone. The great thing about deep soil is that it enables planting of significant vegetation, which has the ability to grow to a mature size and provide a permeable ground surface alternative to paving or other hard surface treatments, which allow infiltration of surface water into the soil.

That's something a raised garden can't give you.

CENTRAL COURT | NORTHEAST VIEW

Garden sanctuaries encountered throughout the project, display tranquil arrangements of trees, thanks to the deep soil zone.

CENTRAL COURT | SOUTHWEST VIEW

In every walk with nature one receives far more than one seeks.

**THERAPEUTIC GARDEN WITH EXTENDED PAVING
CONNECTING PRODUCTIVE LANDSCAPES**

03

THE TOWERS

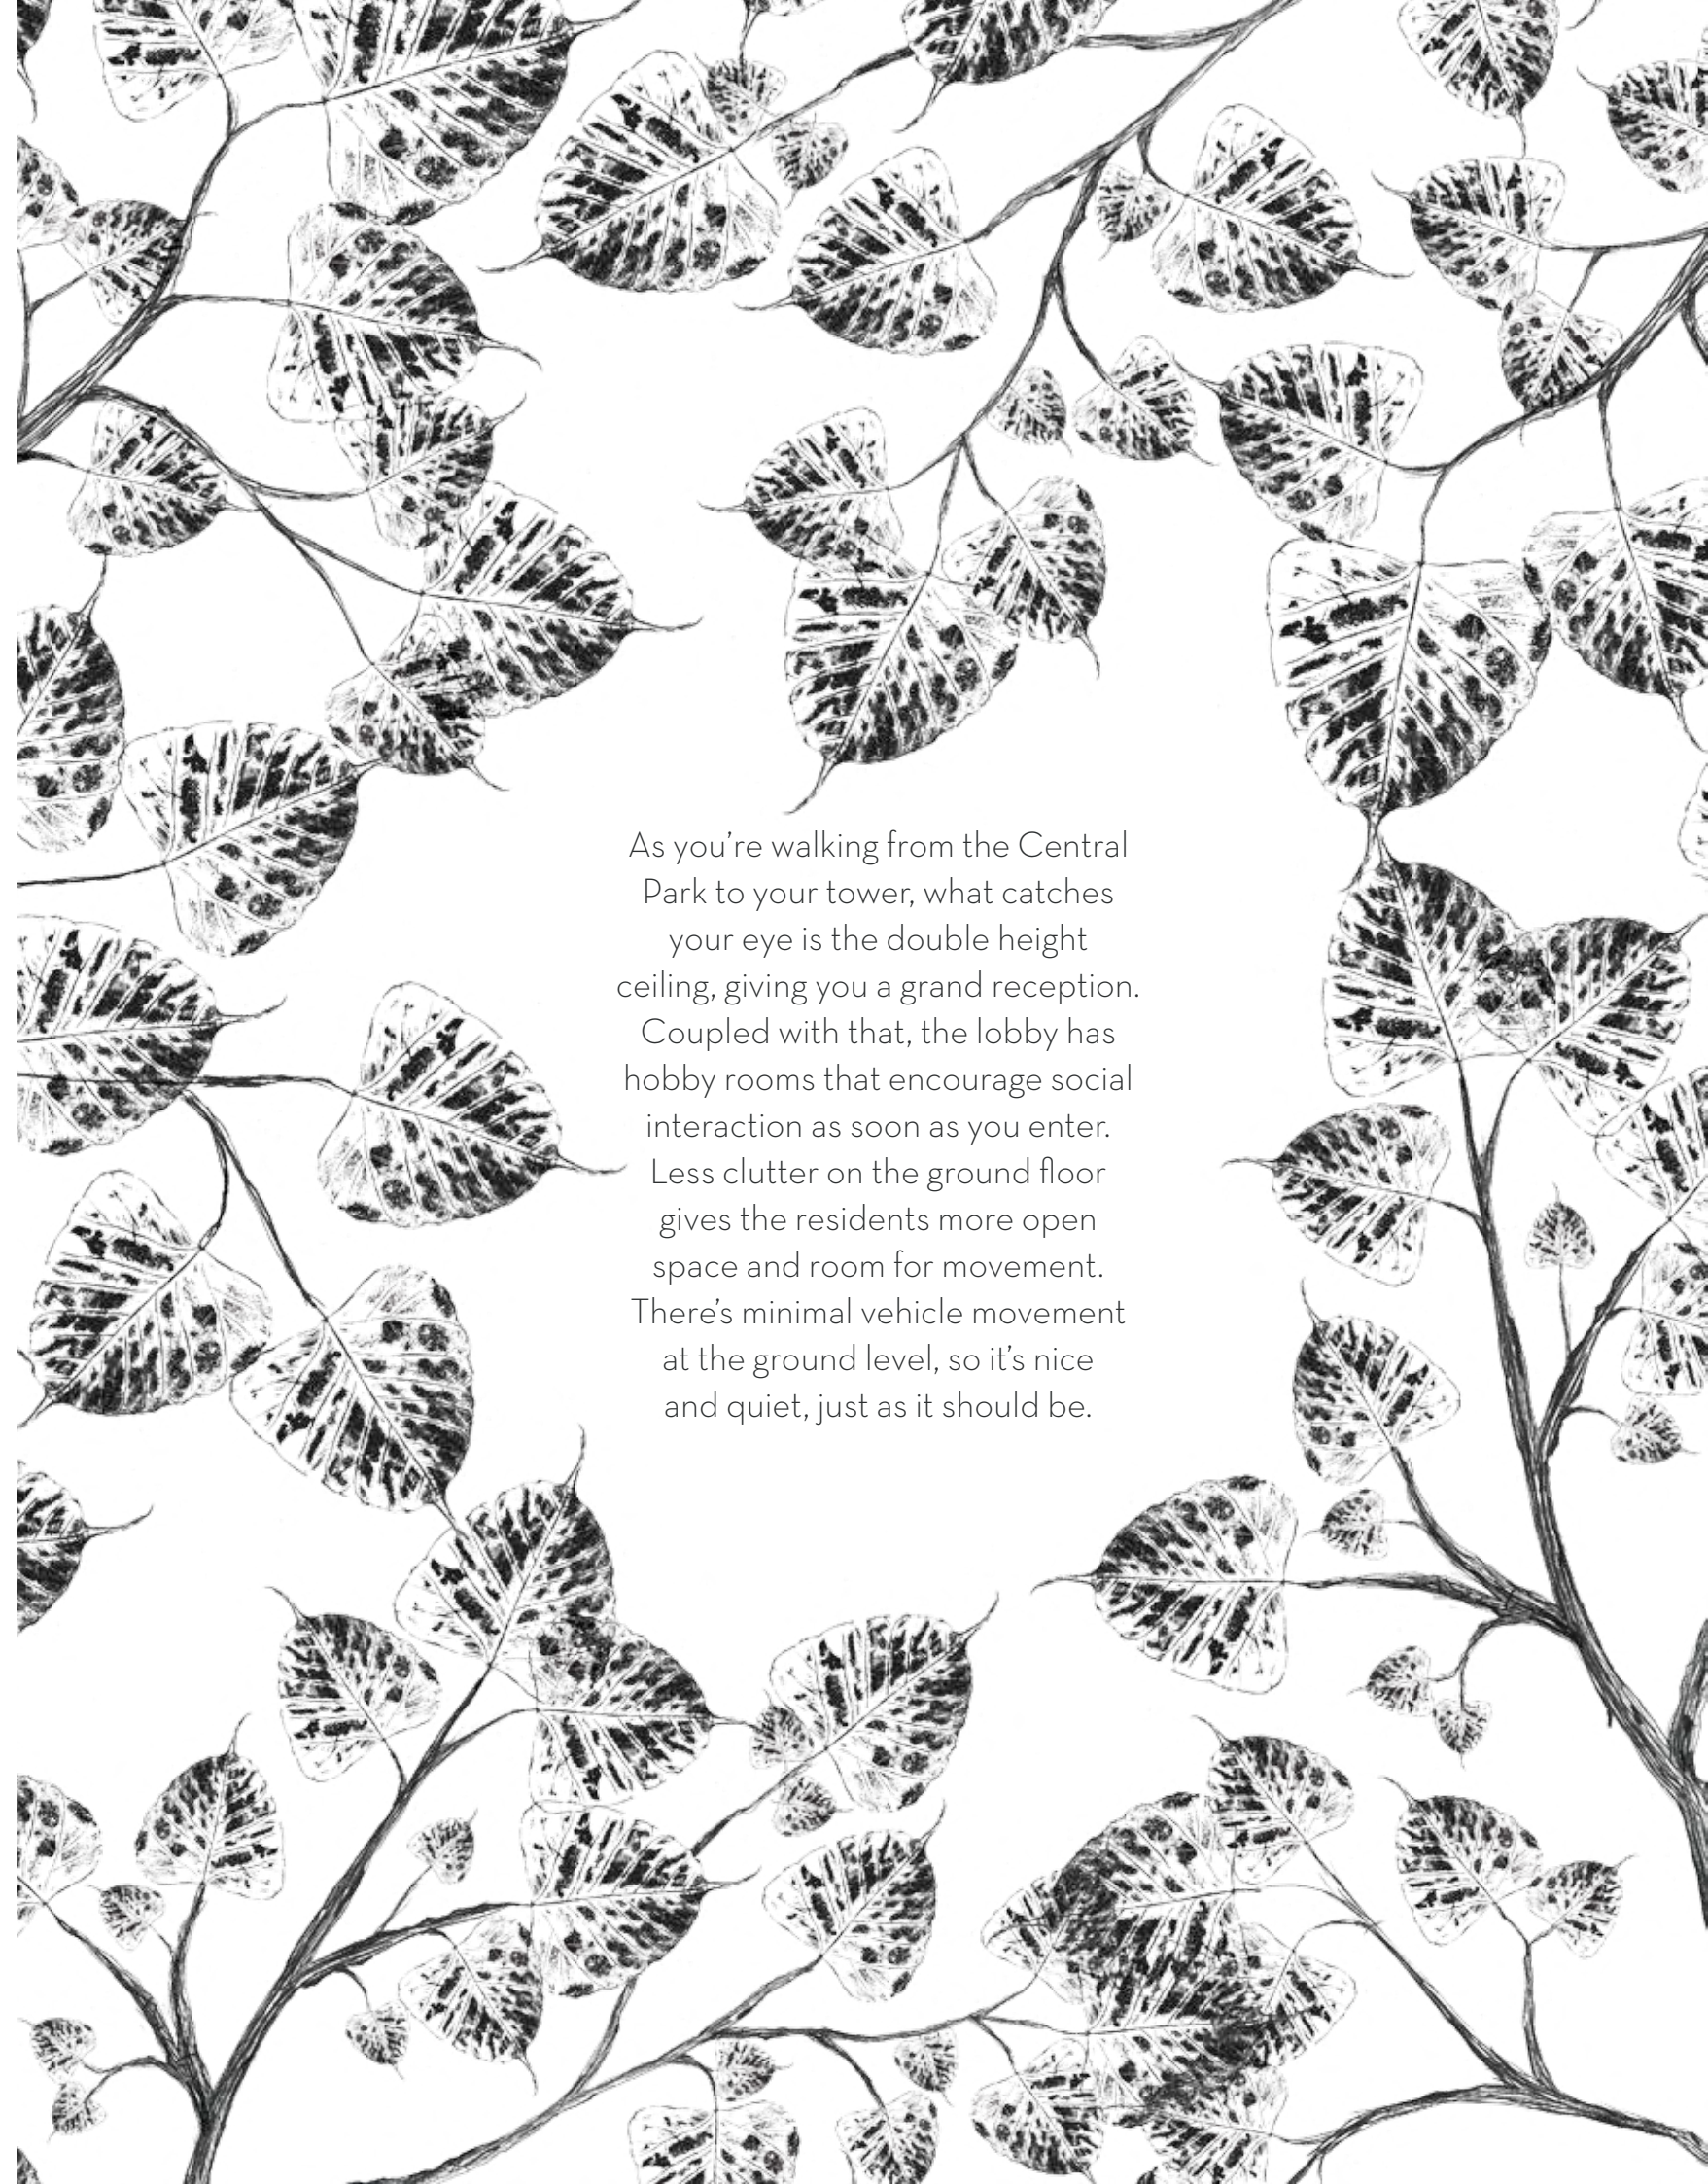

Built with Science. Designed with Nature

Myscape Sanctuary contains 4 residential towers with 15 habitable floors and 2 basements in each tower. As the double height grand entrance is approached, the tower's stunning botanical features and architectural details begin to reveal themselves.

Each tower has Sky decks, Sky bridges and Double height lobby. The towers will have distinct natural treatment to the façade with planter boxes that have a variety of plant species. The unique arrangement of towers allows transient view across the blocks beyond the residential complex.

Double height entry on the ground floor

As you're walking from the Central Park to your tower, what catches your eye is the double height ceiling, giving you a grand reception. Coupled with that, the lobby has hobby rooms that encourage social interaction as soon as you enter. Less clutter on the ground floor gives the residents more open space and room for movement. There's minimal vehicle movement at the ground level, so it's nice and quiet, just as it should be.

**A VIEW FROM THE TOP.
AND BOTTOM.**

CENTRAL COURT VIEW FROM DOUBLE HEIGHT ENTRY

This is a feast for the senses

Especially for residents, who benefit from apartment and garden designs maximized to achieve the best possible use of space and light.

HOBBY ROOMS. WITHOUT YOU HAVING TO WALK A MILE.

Hobby rooms have been created above the entry lobby in each block, a feature that is unique to this property. These rooms, measuring a grand 1200 Sq Ft are in addition to the Clubhouse and will give the residents a chance to pursue what interests them, be it dance, music or yoga.

**Scientifically speaking,
we were made to bond
with one another.**

**Architecturally
speaking, people bond
better on a sky bridge.**

SKY BRIDGES

As the name suggests, these are bridges connecting two neighbouring towers that allow friends or relatives to seamlessly interact with one another. Sky Bridges allow for better connectivity between the towers, optimising the use of elevators. The towers are separated yet connected, and they help to connect communities together. Each tower will have these Sky Bridges connected on every floor.

SKY DECKS

Extended sky decks in the tower corridors act as a place for regrouping of people for a quick break or catch up.

04

THE SANCTUARY CLUB

The Science of Socialising

There are clubhouses. And then there's The Sanctuary Club that measures an impressive 30,000 square feet. Making it infinitely easier for people to socialize with each other in a beautiful space.

Welcoming you as soon as you drive into this property, The Sanctuary Club is connected to the central open space and because it's visible from all the flats, there's a much higher scope of it being used.

The way we see it, the more social people are, the better life they have.

05

THE APARTMENTS

A Haven on Earth

The apartments at Sanctuary are meticulously designed to provide ample privacy, be it through the thoughtfully designed lighting, the ventilation, the distinct yet seamless entry foyer living, or the dining space and balconies, complete with a personal garden.

The need to modify the interiors is considerably less simply because the apartments are well thought out with a host of services already integrated in the design.

The 13 variations of unit plan offer a wide choice to its discerning clients, doing away with repetitive layouts.

There are in total
367 apartments
of varying sizes

1328 - 1350 Sqft 2BHK
1716 - 1746 Sqft 3 BHK
1936 - 1981 Sqft 3 BHK
2304 - 2349 Sqft 3 BHK

The above apartments
comes with East, West
& North facing entries.

367

If the first thing
you see when you
open the door

is another door,
that can't be
very good living.

The flats at Sanctuary have been designed and staggered in such a way that it enhances the corridor experience. The arrangement of units in each tower allows for free movement of its residents in the corridors thereby avoiding bumping into people the minute you step out. Also, this design allows for each unit to have its own personalized touch in front of their house. Making it their own personal foyer of sorts.

**YOUR HOME.
BEFORE YOU
ENTER YOUR HOME.**

The recessed detail at the entrance allows you to design it exactly the way you want to. Making it a sneak peak into your home.

A balcony so long, it's a veranda, a terrace with a garden.

Imagine this. A balcony so long, that not only is there space for a table and a few chairs for you to sit and enjoy the sunset, but there's also a terrace from where you can look up into the beautiful sky. And if that wasn't enough, there's a private garden for you to grow your own potted plants too.

**NO TWO PEOPLE ARE ALIKE.
NO TWO GARDENS SHOULD BE EITHER.**

At Sanctuary, you have your own personal garden.

THE BEDROOM

Because the windows are low sill and go all the way up to the beam, there's plenty of clear, natural light that streams into your room at all times.

LIVING & DINING

The entry to each apartment goes seamlessly into the living area, which further extends into the long balcony. Full height sliding door open up to a spectacular view outside, lending each apartment a spatial quality that's unique to Sanctuary.

06

THE GEOGRAPHY

A Sanctuary, right in the Heart of a Busy City

Situated near HITEC city, Sanctuary enjoys proximity to work while being delightfully cut off from the hustle and bustle.

Being an established IT district, the area has a thriving social infrastructure and is also one of the most preferred residential localities by working professionals.

Infra projects like Strategic Road Development Project (SRDP), Metro and multi-laning of existing roads are under implementation by the local government which is likely to propel growth further in the location.

No wonder, it's one of the most preferred residential areas of Hyderabad.

**The ethos of
discovery meets
the promise
of an oasis of
tranquility in
the new centre
of Hyderabad.**
